3. **Geometric morphometric**

3.1. **PCA**

PCA was used to explore the shape variation of the mandible. The first two principal components explained 21.1% and 17.8% of the total shape variation, respectively. The first component (PC1) explained the variation in the overall size of the mandible, while the second component (PC2) explained the variation in the shape of the body of the mandible.

3.2. **Thin Plate Spline (TPS)**

TPS was used to visualize the shape variation of the mandible. The first two principal components explained 21.1% and 17.8% of the total shape variation, respectively. The first component (PC1) explained the variation in the overall size of the mandible, while the second component (PC2) explained the variation in the shape of the body of the mandible.

the first time in the history of the world, the people of the United States have been called upon to determine whether they will submit to the law of force, or the law of the Constitution. We consider the question to be, whether the Southern Slaveholding States have a right to secede from the Federal Union; and, if so, whether the Federal Government has a right to suppress them by force. We believe that the Southern Slaveholding States have a right to secede from the Federal Union; and, that the Federal Government does not have a right to suppress them by force.

Editorial note

It is with great pleasure that we present to you the first issue of *Journal of Clinical Psychopharmacology* for 2002. This journal is the official publication of the American Academy of Clinical Psychopharmacology (AACP) and is the only journal devoted exclusively to the clinical application of psychopharmacology. The journal is peer-reviewed and published quarterly.

The purpose of the journal is to provide a forum for the dissemination of information on the clinical use of psychotropic drugs. The journal publishes original research articles, review articles, and clinical case reports. The journal also publishes editorials, commentaries, and book reviews. The journal is intended for professionals in the field of psychopharmacology, including psychiatrists, psychologists, nurses, and other health care providers.

The journal is published by Lippincott Williams & Wilkins. The journal is indexed in the Cumulative Index to Nursing & Allied Health Literature, the Index Medicus, and the Psychological Abstracts. The journal is also available online at www.lww.com/jcp.

We hope you will find the journal informative and useful. We welcome your comments and suggestions. Please feel free to contact us at editor@lww.com.
